EDUCATION

Techno Engineering College Banipur, WB, India

Bachelor Of Technology, Electronics, and Communication Engineering

(2016 - 2020)

> CGPA: 8.14

Work Experience - ByteMe Technologies LLP Indore

Software Developer, (July-2022 - May-2023)

Client - (Network18 Media and Advertisements Limited)

Build a YouTube Job with Primary Channel's ID in the Video CMS Project (Backend Team): This task involves creating a job or process related to YouTube integration within a Video CMS project. Working on a backend process that involves fetching data from a YouTube channel using its ID and incorporating that data into the Video CMS system.

Developed an API to Save Failed Stories for Retry Purposes in the FILE18 (Backend Team): This task involves building an API as part of the backend team for the FILE18 project. The API's purpose is to handle and store stories that have failed during processing, likely for later retry attempts.

R&D Report on RabbitMQ Routing & Fanout Concept: This task has both research and implementation components.

ACCOMPLISHMENTS

- Coding Problems Solved in the **Leetcode** Platform.
- Coding Problems Solved in the **GFG** Platform.
- Coding Problems Solved in the **CodeChef** Platform
- Secured **Master League** Batch in **Coding Ninja** Platform.
- University Rank **#11** on **GeekforGeeks Problem Solving**

PROJECTS

Contact-Manager | Developer - May 2022 | ReactJS, CSS, NodeJS, ExpressJS, MongoDB ([Link](#))

- Technologies: React.js, CSS, Node.js, Express.js, MongoDB
- Implemented features for adding, editing, deleting, and searching contacts.
- Created a dedicated section for displaying detailed information for each contact.
- Included user authentication features such as user registration and login functionality.

Crypto-Currency Tracker | Developer - June 2023 | ReactJS, Material UI, ChartJS ([Link](#))

- Technologies: React.js, Material UI, Chart.js
- Designed the app to track live data, including price, volume, and change, for various cryptocurrencies.
- Integrated Chart.js to visualize cryptocurrency data trends.
- Fetched live data using APIs from Coin Gecko, a popular cryptocurrency data provider.
- Deployment Link - [crypto-currency-tracker](#)

INTERNSHIPS

10x Academy | Online Full Stack Bootcamp ([December 2021 - May 2022](#))

Duration: 6 months **Program:** Full Stack Bootcamp

- **Technologies:** HTML5, CSS3, JavaScript, NodeJS, Express JS, MongoDB.
- **Responsibilities:** Gained experience in the backend using Node & Express.js, including connecting frontend and backend.
- Worked with MongoDB, a NoSQL database, for storing and retrieving data.
- Explored the process of connecting frontend and backend to fetch data using RESTful APIs for both retrieving and posting data.

Tier5 Technology Solution Pvt Ltd | Kolkata ([February 2021 - June 2021](#))

Duration: 6 months **Role:** Internship focused on web technologies

- **Technologies:** HTML5, CSS3, JavaScript, Advance JavaScript, Web Application, GIT.
- **Responsibilities:** Gained experience in Web Applications, JavaScript, and Advance JavaScript, GIT.
- Gained practical experience in version control using Git for collaborative coding.
- Demonstrated problem-solving skills by troubleshooting and debugging issues in web applications.

SKILLS

Programming Language and Framework

Data Structure and Algorithms, C++, Python, JavaScript, HTML5, CSS3, AngularJS, ReactJS, Node.js, MongoDB, Express JS.

Microservices, RabbitMQ, OOPS (using C++), SQL, RESTful APIS

Core CS Subjects Knowledge

Operating System, DBMS, Computer Network.

Familiarity with Code debuggers within popular IDEs - VS Code, IntelliJ.

CERTIFICATES

Programming in JAVA - NPTEL (Jan 19 - Apr 19),

Programming in C - NIIT (Aug-2017),
