## PROJECTS

Personal Finance Tracker
https://650d3c89d37e241542d53d29--dynamic-gumption-c01916.netlify.app/
Github link - https://github.com/shrutijain2296/Financely--personal-finance-tracker/tree/main
A simple and efficient personal finance tracking application using React and Firebase. With the goal of managing personal finances effectively. It is a user-friendly interface, implemented authentication and database functionalities, visualize financial statistics, track transactions, and more.
Crypto Tracker
https://capable-macaron-5e7439.netlify.app/
Github link - https://github.com/shrutijain2296/Crypto-tracker/tree/main
Utilizing React JS, Material UI, Chart JS, Axios, React Router, and the CoinGecko API, this project delivers a responsive and real-time crypto tracker. It empowers users to compare cryptocurrencies, examine their price fluctuations, total volumes, and market caps, while enabling the addition of preferred currencies to a watchlist. The Framer Motion library enhances the user experience with seamless animations.
Excel Clone
https://shrutijain2296.github.io/Excel-clone/
Github link - https://github.com/shrutijain2296/Excel-clone
This project is a web-based Excel clone built using HTML, CSS, and JavaScript. It replicates Excel's key features, allowing users to create and edit spreadsheets, format text, align content, choose fonts and sizes, and manipulate data with copy, cut, and paste functionality. It supports multiple sheets for efficient data organization and enables users to download and upload their work as JSON files.
