75%

FINAL YEAR PROJECT

SMART HOME DEVICE:

Role-Team Head

Team Size-3

Project Duration-2 month

ABSTRACT:

The smart home device is a main component in linking the parts and nowadays it acts as a competitive factor. Hence, it has become very necessary to manage home effectively and allocate their resources efficiently. Smart Home Device have been developed for monitoring, and controlling the home operations, but with the increasing dynamicity of the market, traditional systems have become less efficient and unsuitable for today's market requirements, that's why new technologies have started to emerge to be used for such applications. Internet of Things (IOT) is a promising technology that can be used in the context of Industry.

In this project we control the home device like ac and heater and monitor the temperature and humidity on real time over a wifi network and ability to control some parameters remotely. using this device any electrical tool can control by smartphone. From using this project save electricity and time.
