- Problem solving skills

PROJECTS

- IOT HOME SECURITY
IoT (Internet of Things) home security refers to the use of interconnected devices and technology to enhance the safety and security of a residence. These devices, such as smart cameras, door sensors, motion detectors, and smart locks, are connected to the internet and can be controlled and monitored remotely through a smartphone or computer. They provide real-time alerts, video feeds, and automation capabilities, allowing homeowners to keep an eye on their property and respond to potential threats from anywhere. This technology aims to improve convenience, surveillance, and overall security for homeowners.

INTERESTS

- Digital Communication
- Programming language

ADDITIONAL INFORMATION
