- Jenkins

Test Management Tool:

- Test Link

Bug Management Tool:

- Jira

Database Schema

- Oracle SQL

PROFESSIONAL EXPERIENCE

Quality Analyst

Aurus Inc

Project: StorePlace

Nov '2021 - Present

Pune, IN

Summary: StorePlace is a portal which belongs to Payment Domain for Merchants with outstanding features such as to manage Payment Acceptance User Accounting ,Store Operations ,Device Information and Loss Prevention.

Responsibilities:

- Analyzed **business requirement specifications** and developed **Test strategy, Test plans and Test cases** for various functionalities.
- Performed **End2End Functional Testing, Regression Testing, and Retesting** of StorePlace UI.
- Delivered the release by testing more than **450** test cases. Raised **critical bugs** related to various features and followed **Defect Life Cycle** rigorously in order to control and handle every defect effectively.
- Created Test Automation scripts using **BDD Cucumber** and **Selenium** with **Java**. Followed industry best practices for Automation using the below review checklist:
BDD Feature File scripts: Segregated feature files in a hierarchical manner of Epic, Story, and Test cases. Used hooks to differentiate between Smoke, Regression and Parallel test cases.
Test Data: External Test Data files to be used for storing test data. Create Test Data file per EPIC and use EPIC Jira key to name test data workbook
Locators: Segregate Locators and Xpaths based on Web Pages.
Version Control: Create a feature branch from the "develop" branch while starting automation for each story/feature. Use Story Jira key to name feature branch.
- Developed Custom Reports based on client requirements using PostgreSQL.
- Developed Automated Test Suit for web application.
