

# Ankita H. Zore

A multi-faceted professional with 4+ years of experience in developing data-driven BI Solutions/ ETL developers to Increase efficiency, accuracy, and utility of data using edge-cutting technologies.

- Location - Mumbai (India)
- Contact – (+91)8369-082-160
- Gmail – [zore0196@gmail.com](mailto:zore0196@gmail.com)

## TECHNICAL SKILLS

- PL/SQL
- SSIS
- SSRS
- MySQL
- MS-SQL
- Microsoft Excel
- ETL Tool: SSIS
- Visualization Tool: SSRS, Power-BI

## CERTIFICATIONS

- PYTHON
- MACHINE LEARNING
- Web Design

## CORE COMPLETION

## PROFILE SUMMARY

### (SQL Developer/SQL Support/ Data analyst BI)

- Have 4+ years of experience in writing SQL & PL-SQL on queries using Joins (inner and outer joins).
- Worked on CTE, temp Table, derived table, and rank, dense rank function.
- Experience in developing views using sub-queries.
- Knowledge of SQL set operators like Union, Minus, and Intersect.
- Used SQL functions like replace, trim, substring, instr, to\_date, to char, etc.
- Strong knowledge of group by clause and aggregate function (sum, avg, max, min, count).
- Restricting data using where, Group by, order by, and having clause.
- Transaction control using Savepoint, Commit, and Rollback.
- Sound knowledge of SQL DDL statements like Create, Alter, Drop, and Truncate.
- Knowledge of other objects like Sequence, synonyms, Views, and Indexes.
- Proficient in database designing (Referential integrity – Primary Key, Foreign key Constraints).
- Expertise in designing, building, implementing & optimizing BI solutions/ technologies including ETL, Data Warehouse, and reporting/ Visualization in alignment with business/ information systems in various domains like Banking, Financial, Insurance and e-commerce.
- Skilled in defining short- & long-term strategies for corporate BI/ analytics programs to ensure effective delivery of information that meets current & future requirements; strong acumen in organizing, analyzing, synthesizing, or summarizing data using appropriate methodologies.
- Hands-on experience in using diverse technologies, tools, and frameworks such as MSBI (SSIS), etc.
- Strong understanding and experience in Data Analysis and Data Warehouse and with a solid understanding of Business Requirement Gathering, Business Process Flow, Data Mapping, and Data Modeling.
- Efficient in mapping requirements of clients as well as different service

## WORK EXPERIENCE

**Kensium solution PVT.LTD, Hyderabad (Support Analyst-2)**  
From Feb 2023.

**Client: - Day Spring & North 40 outfitter**

Key Result Areas:

- Migration Of large amounts of Data.

## SOFT SKILLS

- Collaborator
- Communicator
- Planner
- Change Agent

## EDUCATION

- Bachelor of Science - Computer Science – 5.75 CGPA, Mumbai University
- Data Science Course | IT Vedant Pvt. Ltd

## PERSONAL DETAILS

- Language Known: - English, Marathi & Hindi
- Marital status: - Single

- Creating ordinary to complex queries involving multi-table joins, Unions, Clauses, and correlated subqueries.
- Analyze and provide reports to clients.
- Design Reports in SQL, SSRS, and SSIS tools.
- Create and modify code of SQL, PLSQL, and SSRS to provide reports to the client as per their requirement.
- Resolve client issues related to the Report.
- Writing complex queries and providing data according to bank requirements.
- Coordination with developer/vendor for prioritizing requirements.
- Developed/Modified various database objects like Tables, Triggers, Views and Stored Procedures, and ad-hoc queries.
- Developed SSIS Packages/ Debugging of SSIS packages.
- Experience in Error and Event Handling: Precedence Constraints, Check Points, Logging, Error handling using Event.
- Handlers, Archive data files from different legacy systems using SQL Server 2008/2012/2016 environment, and
- Deploy, and schedule the jobs to execute these tasks periodically.
- Query optimization and performance tuning.
- Application Support for end-users / business partners/ internal users. Review of Production problems and Root
- Cause analysis.
- Data migration (import & export - BCP) from Text to SQL Server.
- Developed reports on SSRS and Power BI.

## ONGOING PROJECT

### Project: Aircel & H-mart

#### Key Responsibilities:

- Creating ordinary to complex queries involving multi-table joins, Unions, and correlated sub-queries.
- Knowledge of Banking Databases and insurance.
- Create and modify the Code of SQL, and PLSQL to provide reports to clients as required.
- Resolve client issues related to the Report.
- Writing Sub- queries, stored procedures, and functions.
- Checking the database connection & installing the packages that fulfill the requirements database.
- Migration Of large amounts of Data
- Experience in Error and Event Handling: Precedence Constraints, Check Points, Logging, Error handling using Event.
- Handlers, Archive data files from different legacy systems using on SQL Server 2008/2012/2016 environment, and
- Deploy, schedule the jobs to execute these tasks periodically.

**PROJECT: Digital River**

**Client: Code-store Software Pvt. Ltd.**

**Duration: May 2018- Dec 2022**

**Role: SQL Developer**

**Roles &Responsibilities:**

- Creating ordinary to complex queries involving multi-table joins, Unions, and correlated sub-queries.
- Knowledge of Banking Databases and insurance.
- Create and modify the Code of SQL, and PLSQL to provide reports to clients as required.
- Resolve client issues related to the Report.
- Writing Sub- queries, stored procedures, and functions.
- Checking the database connection & installing the packages that fulfill the requirements database.
- Migration Of large amounts of Data
- Experience in Error and Event Handling: Precedence Constraints, Check Points, Logging, Error handling using Event.
- Handlers, Archive data files from different legacy systems using SQL Server 2008/2012/2016 environment,
- Deploy, and schedule the jobs to execute these tasks periodically.

**PROJECT: Vedahills**

**Client: Code-store Software Pvt. Ltd.**

**Duration: May 2018- Dec 2022**

**Role: SQL Developer**

- Creating ordinary to complex queries involving multi-table joins, Unions, and correlated sub-queries.
