CERTIFICATES

Introduction to Java Programming

Successfully completed the 'Introduction to Java Programming' course on Coursera, gaining comprehensive knowledge of Java fundamentals. Covered topics include Java Datatypes, Operators, Decision Making Constructs, Looping Constructs, Arrays, and Exception Handling. Additionally, acquired proficiency in core Java concepts.

Intermediate Object-Oriented Programming with Java

Proficient in Object-Oriented Programming with Java, with a focus on advanced concepts and their practical applications.

Modern JavaScript: ES6 Basics

Completed a comprehensive course on mastering modern JavaScript, with a strong focus on fundamental ES6 features. Proficient in writing modern JavaScript code and leveraging ES6 for enhanced functionality. Expertise includes working with arrow functions, variables, template literals, and more.

Introduction to Web Development with HTML, CSS, JavaScript

Mastered essential web development skills including HTML, CSS, and JavaScript in this course. Additionally, gained proficiency in version control using Git and GitHub.

PERSONAL PROJECTS

Techblog - Servlet, JSP & MySQL

- Designed and developed a dynamic web application utilizing Servlets, JSP, and MySQL for backend operations. The application includes:
 - User authentication with login/signup functionality.
 - Category-based post creation for registered users
 - Viewing and interacting with posts from other users, including likes and comments.
 - User profile management, allowing for easy editing of details.
 - Displaying recent posts on the homepage for improved user experience.

ACHIEVEMENTS

I have got 131 rank in my institute in GeeksforGeeks and my total score is 235

LeetCode Problems Solved: 60, LeetCode Points: 327

5-Star Rating in HackerRank C++
