## **Projects**

- **Moon Duel**  
It is a software like other trading application where user comes and play game. If they win, get some amount. User can chat and comment. At a time, multiple user can play.
- **promedia.com**  
This is US based project. I worked on using PHP, MySQL, jQuery, JavaScript and SQL server. This project is basically used for media and entertainment industry.
- **Sourcing Tool**  
Sourcing tool is software for recruitment. There are individual panels for BDM, Manager, Recruiter, Client, Account and Admin. All the recruitment process can be done by using this software. Recruiter can send the candidate's profile to client, and make the candidate's profile status like shortlisted, interviewed, selected, joined etc. as per the client's approval. There are several report generated by this tool on the daily basis, weekly basis for Managers and admin to track the resources utility. Also admin can get the several report to track the organisation's revenue.
- <http://pranavaayurveda.com/>  
Pranava Holistic Healing & Rejuvenation is an associate clinic of Dhanavantari Vaidyashala and a brainchild of Dr. Madhusudhan founded in 2007. The primary inspiration behind Pranava was to promote a flexible, all-encompassing and 360° wholesome treatment for various medical issues the individual faces in this modern setting. For this, we needed to develop a website and also there should be functionality for "Book an Appointment" Apart from this after development, need to advertise into the market, for that need to coordinate with digital marketing team work on the website according to them.
- <http://www.xyzjobs.in/>  
XYZ Jobs is an end-to-end solutions provider for both recruiters and jobseekers. Connecting hiring requirements with the best candidates, bridging the gap between sourcing demand and supply. This project required dynamic job posting along with registration and login. Jobs search. For this it required database. Also it required a admin panel to manage the posted jobs, registered users, and subscribed users.
- <http://www.hullonurse.com/>  
Hullonurse.com is project to attain the online test to shortlist the candidate for Nursing based positions in UK & USA. Once candidate will pass this onle test, that candidate can go for the International exams like IELTS, PTE etc. to do the job in UK. In

this project the result will be calculated for each and every sections and display to the candidate. To manage this application, there is an Admin panel from where questions & Answers is being uploaded for candidate. Along with this, all results, registered users and subscribed users are being managed by Admin Panel. Also, this application is compatible for SEO and digital Marketing.

- <https://www.hullojobs.com/>

Hullojobs.com is recruitment portal that consist of several service like Resume Priority, Cover letter, Resume Blast etc. along with jobs based on skills, designation, industries, category, companies and salaries. This portal is like a naukri.com that consist a Admin panel to manage Recruiter's and Jobseeker's data. There are several paid services for which payment gateway has been used. There are lot of sections for jobseekers and recruiters to manage the Jobs and Resume. In this project, recruiters can post the jobs to which jobseeker can apply and recruiters can shortlist those candidates in their panel. For recruiters and jobseekers, it's all in one platform. Here search engine is also strong enough to find the exact job or profile as per the requirement.

Developed e-commerce websites and web applications according to clients. Developed Web applications.

Write the suitable code for the projects. Testing of developed websites or applications.
