## PERSONAL PROJECTS

#### 1. Android Phones Store (8/2022-8/2022)

E Commerce Application Using Angular typescript and Html with Bootstrap and JavaScript.

**Features as:** Users Can Add Multiple Mobiles in Add to Cart and At Last User Can See the Total Amount.

#### 2. E-Rakta Kanika (01/2023- 04/2023)

Blood donation Application using **Front-end as React Middleware as Java (Spring boot) and Backend as SQL** This App has a dedicated panel for User and Admin. Authorized admin can Add, delete and Update and Raise requests.

#### 3. Utility Bill Application (7/2023 – 8/2023)

Created this Application with User and Admin Module.

I have Created this in Angular and Dot Net Web API

In Admin Module admin can see User Details, Admin can Update

Status, Admin can generate bill

In the User Module User can see the Status of the Application, User

can see their status and admin created Bill.

## WORK EXPERIENCE

### Software Engineer

Think Bridge

6/2023 - Present

Pune India

*Achievements/Tasks*

Working on a Project which has Dot Net and Angular Technology and DevOps.

## Solution Analyst

### Sankey Solutions

02/2022 - 8/2022,

Mumbai, India

My primary responsibilities involved developing and maintaining the back-end and Front-end infrastructure of our applications. This included designing and implementing robust APIs, managing databases, and ensuring smooth communication between the front-end and back-end systems. I collaborated closely with the front-end development team to ensure seamless integration and a cohesive user experience. Additionally, I focused on optimizing the performance and scalability of our server-side code, while also ensuring compatibility across different platforms and devices.
