IT Training Programme in Core-Java "YASH COMPUTER INSTITUTE,Pune" (09/2022 - 12/2022)

Smart India Hackathon 2022 (Internal Hackathon) Participation Certificate (08/2022)

PERSONAL PROJECTS

"Society Management System" (12/2022 - 05/2023)

- The Society Management System is web application that manages society by houses with members details. The basic concept of this society system, we create local web based application in html,css,js with Java language to manage Society with House and Owner of house detail. We provide platform to register society to our system, and there are many houses according to each society.

"Online-Personal Health Care" (09/2022 - 2023)

- The proposed system uses website for real time monitoring and analysis of the patient's health parameters and in return provide medication. It is easy for doctors and the caregivers to immediately act in emergency cases, and also to provide medication depending on the health parameters without the physical presence of the doctors.

"CLAPPING SWITCH" (08/2021 - 07/2022)

- This is the Mini-Project based on IOT. It is group project lead by me. We have done this project in Third year of Engineering. We have designed this project to reduce human effort . With the help of this project we can easily switch on or off the lights by remote control.
