WORK EXPERIENCE

NCRTC (National Capital Region Transport Corporation)

IT intern

09/2022 - 01/2023

New Delhi, India

Achievements/Tasks

- Collaborated with developers to create an intranet of NCRTC based on SharePoint primarily on HTML/CSS.
- Actively involved in the development of a Safety dashboard for monitoring the safety aspect of the RRTS project. Provided a centralised along with a team of developers on Javascript, HTML, CSS and bootstrap with PostgreSQL, PL/sql for backend queries.
- Honed my skills in structured requirements analysis, meticulously capturing project details.

Kapiton Dynamics

Business analyst Intern

05/2021 - 03/2022

New Delhi

Achievements/task

- Creating website layout/user interfaces by using standard HTML/CSS practices. Writing well-designed efficient code through software development practices.
- Played a pivotal role in requirements management, collaborating with the team to create and maintain detailed baselines and establish traceability for project deliverables.
- Brought a fresh perspective to the team's problem-solving endeavors, consistently offering innovative ideas and creative solutions to tackle complex challenges.
- Demonstrated my aptitude for change management by assisting in identifying, assessing, and implementing necessary adjustments to project plans and deliverables.

PERSONAL PROJECTS

Bank Management System (10/2021 - 11/2021)

- I have developed this application by using Java, jdbc and sql, jsp, servlet. And for front end i have used html, css, bootstrap, Javascript. This application is basically a web based application where the functionalities are like user authentication, customer account creation, can deposit, can withdraw and also can delete their account. - Technologies used - java, jdbc, sql, jsp, servlet, html, css, bootstrap, Javascript.

Tic Tac Toe (08/2020 - 09/2020)

- This project was created using Java, this is a game where applied principles of object oriented programming by using classes to encapsulate and abstract the board.

To-Do list app (01/2023 - 02/2023)

- This is a dynamic Web Application that uses an ejs view engine for creating the view and we stored the database using MongoDB and node js.

SKILLS

Java

Python
