- Understanding and development with alignment to the business requirements.
- Analyzing and Enhancement of End to End flow of the backend application.
- Authentication and Authorization of user with multiple permissions and conditions.
- Creation and managing the database using the backend application and PG Admin.

- Deployment of the backend application in the server and testing in multiple environments.
- Email Service Integration in the web application (SEND GRID).
- Collaboration and Technical Assistance with backend team.
- Involved in Testing API's in Swagger.

Description:

LaaS (Logistics as a Service)

- Contributing to the development of a unique logistics platform that leverages smart technologies to offer choice, convenience, and cost arbitrage to the industry.
- The platform aims to integrate multiple shipping providers and individual truck owners while tracking their activities.
- Supporting the LaaS business model for logistics demand aggregation beyond marketplace requirements.

Tamweel:

- Developed a superior loan lending application that connects customers with banks offering loans based on their personalized criteria.
- Optimized loan cycles, facilitated quick decisions, and reduced turnaround times for loans through digital lending solutions.
- Connected customers with banks that align with their personality criteria for a personalized loan lending experience.

ACHIVEMENTS

- Got recognition from organization as one of the best performer as Jr.Software Developer in Tamweel Project.
