### OBJECTIVE

A result-oriented professional with an experience of 2 years in Information Technology industry. Looking for a better opportunity where I can enhance my skills and knowledge for the betterment of organization.

### TECHNICAL SKILLS

- Programming Languages : C, Intermediate in Python & Java.
- Database Management : SQL & MYSQL.
- Testing & Quality Assurance : Automation tool (Selenium), Manual Testing, Android Application Testing, Regression Testing, Performance Testing, Agile Methodologies (Scrum) & Agile Tools (JIRA).

### EMPLOYMENT SCAN

#### PROJECT 1:

**Project** : Chrome App Validation

**Duration** : June 2022- till date

**Client** : INTEL

**Project Description:** INTEL, an American multinational technology company is one of the world's largest and most influential manufacturer of central processing unit and semiconductors. The company is best known for CPUs based on its X86 architecture.

The job at hand involves testing products on the chrome OS platform. In this project we test multiple android applications on various platforms including ARM and x86. We evaluate the application, identify problems, and log them in JIRA. We also offer the developers our suggested solution. We perform regression testing on previously reported concerns. We monitor the reported problems, address them, and then mark them as resolved. OnLinux, We run the GT (Google Tool) script, which automates testing of popular Play Store apps. Depending on the demands of the client, we do differentiation activities.

#### Roles and Responsibilities:

- Charged with testing various Android applications on various Chromebooks and tracking out issues.
- In charge of adding the logs and the bugs to JIRA.
- Use Linux to run GT scripts on devices that automate apps.
- If the reported issues are not seen, perform regression testing and close the issues.
- Carry out TRIAG operations for the JIRA issues.
- In charge of steam game activity and libs scanning activity.

#### Skills:

- Android Application Testing
- Bug creation in JIRA
- Regression Testing
- Python

- Linux
- MS Excel

## **PROJECT 2:**

**Project** : FNBO

**Duration** : Nov 2021-May 2022

**Client** : VISA Inc

**Project Description:** A trusted global leader in digital payment technology, Visa Inc. is an American multinational that makes it easy to send money electronically anywhere in the globe.

The task at hand is using secure FTP file transfer to automate the ACH file upload and download process. The user can automatically upload files from their system to FNBO to a directory on their end and receive files automatically over both SFTP and VPN connections.

### **Roles and Responsibilities:**

- Involved in all testing activities' phases.
- Developing functional test cases, comprehending the requirements, and doing out testing.
- Automation script development and execution.
- Adopting best practices, such as the agile methodology with daily scrum meetings.
- Executing the project's live ready to release operations.

### **Skills:**

- Test Planning
- Selenium
- JAVA
- Performance Testing
- Agile methodologies
