## WORK EXPERIENCE

### Associate Engineer

Nagarro Software

06/2022 - Present

Gurgaon, India

Achievements/Tasks

- Completed a four-month comprehensive testing training program at Nagarro.
- Gained valuable hands-on experience in conducting UI and API testing projects.
- Responsible for creating detailed test cases and comprehensive test plans.
- Proficiently executed test scripts to assess software functionality and reliability.
- Identified and meticulously reported any defects, inconsistencies, and usability issues.
- Successfully managed the complete Quality Assurance (QA) life cycle.
- Collaborated closely with cross-functional teams throughout design, development, and execution phases.
- Demonstrated adaptability and commitment to delivering high-quality software solutions.
- Concurrently, worked as an Associate Engineer on a Power BI data analysis project, showcasing a diverse skill set.
- This project involved utilizing Power BI for data analysis and reporting, demonstrating versatility and adaptability in handling different aspects of software engineering and data analysis.

## PERSONAL PROJECTS

E-Learning web application (09/2020 - 03/2021)

- Project:** Developed a full-stack web application for an e-learning platform.
- Technical Stacks:** Utilized PHP and Laravel for backend development, while creating a responsive and user-friendly frontend with HTML, CSS, Bootstrap JS, and integrated a MySQL database for data management.
- Primary Mission:** Designed and developed a visionary online learning platform, focusing on providing students with a robust and user-friendly educational experience.
- Platform Benefits:** Created an accessible and convenient platform for students to effortlessly access and enroll in various courses, empowering them to acquire knowledge from the comfort of their homes.
- Skill Enhancement:** Gained valuable experience and enriched skill set in full-stack web development, particularly in PHP, Laravel, HTML, CSS, Bootstrap JS, and database management using MySQL.
- Global Impact:** Contributed to the empowerment of knowledge seekers worldwide by providing them with a convenient and accessible platform for learning

Counter & Timer (07/2021 - 12/2022)

- Project Description:** Developed a timer and counter application using Python's Tkinter library.
- Key Contribution:** Played a pivotal role in enhancing user interactivity and functionality through coding expertise.
- Objective:** The primary aim of this project was to leverage existing skills and deepen understanding of Python, leading to expanded knowledge and proficiency in the programming language.
- Skills Gained:** Acquired hands-on experience in Python programming, GUI development with Tkinter, and software application development.
- Impact:** Improved user experience and functionality through the development of a user-friendly timer and counter application.
- Personal Growth:** Strengthened programming skills and gained a deeper insight into Python, contributing to professional growth and expertise.
