## SUMMARY

---

Software Engineer with experience in the development of enterprise applications using **Spring Boot**. Familiarity with cloud platforms like **OpenShift** for application configuration. Basic understanding of **DevOps** tools including **Jenkins** and **Git**. Strong problem-solving aptitude and a passion for leveraging advanced technologies to drive innovation and deliver high-quality software solutions.

## EMPLOYMENT HISTORY

---

### Accenture Solutions Pvt. Ltd.

Oct 2020– Present

#### Software Engineer

Dec 2021 - Present

- Actively participated in the development, and modification of software code according to functional, non-functional, and technical design specifications.
- Collaborated with the business analysis team to design and implement modules for the **Electronic Land Register Application**, ensuring efficient code and reduced database calls.
- Led the development and implementation of new functionalities using Spring Boot, **SOAP web services**, and **Microsoft SQL Server**.
- Mentored new joiners and conducted knowledge transfer sessions for the project.
- Analyzed functional and business requirements for the **Funding Application**, delivering optimized code and ensuring on-time delivery.
- Developed a module for generating PDFs from online funding forms, utilizing **TIBCO Jasper Soft Studio** and **REST APIs**.

#### Junior Software Engineer

Oct 2020 – Dec 2021

- Increased code coverage to **90%** for each module in the Electronic Land Register Application by working on **JUnit** tests.
- Resolved defects reported by the test team and assisted in implementing new functionalities using Spring Boot.
- Monitored code quality using **SonarQube** and assigned issues for code enhancements.

### Natural Support Consultancy Services Pvt. Ltd.

Jan 2020– Jun 2020

Jaipur, Rajasthan

#### Software Engineer Intern

- Collaborated with senior developers to debug and resolve issues in Java-based applications, including an HR Management application and a bilingual banking application.
- Improved the user interface of the HR Management application by enhancing the side navigation menu and login page using HTML/CSS.
- Added new functionalities to the bilingual banking application using the Struts framework.
- Prepared technical documents to assist the development team.
