PROJECTS

Cosmetic Store Management Application.

Developed a Cosmetic Store Management application which helped to make manual work easy and efficient. It also helped to automate work.

I have used C# for frontend and MS SQL for backend work.

COVID-19 Case Analysis and Visualization.

Analyzed and visualized COVID-19 data to understand its spread and impact.

Utilized Pandas to efficiently collect, clean, and preprocess COVID-19 data from diverse sources, ensuring data integrity and consistency.

Demonstrated proficiency in Matplotlib to design and develop visually appealing and informative plots and charts, enhancing data-driven storytelling.

EDUCATION

SNDT University, Mumbai — BCA

December 2020 - April 2023

Graduate degree in Computer Application.

PROJECTS

Railway Ticket Booking App

Designed and implemented the user interface (UI) to provide an intuitive and user-friendly experience for customers.

Created the SQL database schema, including tables, relationships, and data validation constraints.

Programmed core functionalities, including user registration, ticket booking, seat selection, payment processing, and booking history.

Currency Converter

Developed a basic Currency Converter application using Python.

Allowed users to input currency values as integers and provided real-time currency conversion rates.

Produced accurate currency conversion outputs based on user inputs.

WordPress Website

Designed and developed a simple yet functional website using WordPress.

Demonstrated proficiency in creating and customizing WordPress websites to meet client or personal project requirements.

SKILLS

Tech Stacks– C, Python, MySQL, Java, C#.

Utilities– MS Office Suite, Google Cloud Platform, Docker, Jupyter Notebook, VS Code

ACHIEVEMENTS

Gained Certificate on Data Science From Tute Dude

Gained Certificate on Python From HackerRank

Gained Certificate on JavaScript

LANGUAGES

English, Hindi, Marathi, Bengali
