Career Objective

Seeking assignments to work in a creative and challenging environment using cutting edge technologies where I can constantly learn and improve my technical and analytical abilities while enhancing the company's productivity and reputation.

Work Experience :

- Currently working with Capgemini Technology Services, Bangalore since August 2021.

Total experience : 2.1years

Projects:

PROJECT NAME : Positive Pay on the Web (PPW)

Description : PPW/PPWA are web based Union Bank applications which provides service to the bank and bank's business customers. Positive Pay is a valuable product for both the customer and the bank as it mitigates the check fraud. PPW is offered in conjunction with Union Bank's Account Reconciliation service which is the primary system for identifying and processing exceptions, giving customers a complete comparison of issued checks and the bank's record of checks presented for payment. Account Reconciliation System (ART) is the primary system for identifying and processing exceptions.

When the information does not match the check, the bank notifies the customer through an exception report, withholding payment until confirmation is provided to issue or reject. The dollar amount, check number and account number must match or the check is flagged and sent back to issuer for review.

The customer who opts for PPW can login to PPW , update notification type and delivery preference. They can view ,search and access exception history and issue history . Download the Exception history and Issue history excel.

CLIENT : MUFG Bank

TEAM SIZE : 6

Profile : Team Member (Programming)

Declaration : I hereby declare that the above information is true to the best of my knowledge.
