- Handled the entire app development lifecycle, including requirements gathering, UI/UX design, programming, testing, and release management
- Contributed to the design phase of app development by proposing innovative and user-centric designs
- Partnered up closely stakeholders to understand project requirements, ensuring a seamless integration of functionality and aesthetics
- Performed debugging and troubleshooting activities to address reported issues

## PROJECTS

**Project Name:** OMRON connect US/CAN/EMEA  
**Tech Stack:** Swift, UIKit, Core Location, RealmSwift, Health Kit, Connectivity, BLE, Third-party library integration, Charts, Rest APIs,  
**Objective:** To provide a comprehensive platform for monitoring and managing their health data using OMRON health monitoring devices.  
**Solution:** Device Integration, Health Data Management, Trends and Insights, Data Sharing, Localization  
**Achievement:** Over 2 million downloads across iOS and Android platforms, 4.7 rating on App Store, Ranks 166 in Health and Fitness Category

**Project Name:** Shopini Plus  
**Tech Stack:** Swift, UIKit, Core Data, Localization, Alamofire, Apple Authentication, Rest APIs  
**Objective:** To provide a seamless and enhanced shopping experience for users  
**Solution:** Multi-language Support, Customer Support, Easy Order Tracking, User-Friendly Interface, Efficient Search and Filtering  
**Achievement:** Recognized within the industry for its innovative approach to enhancing the online shopping journey and improving customer satisfaction with 4.5 ratings on App Store

## OTHER PROJECTS

**Kitting and Shipping:** Internal application used by a company to check whether the manufactured products function properly, specifically for a company's quality assurance processes. This application served as a vital tool for checking the functionality of manufactured products, ensuring they met the company's quality standards before being released to the market.

**Inspect:** It was designed to streamline task monitoring and completion for businesses operating in shopping malls, parking areas, etc. It provided real-time visibility into task assignments, progress, and completion status, enabling managers to effectively monitor and optimize operational workflows.

**TwoDotDash:** It was a modified version on Inspect App (described above) where one task can be divided into multiple person.

**Into the Stands:** It was designed specifically for children to watch videos.This app was thoughtfully designed to provide a curated collection of videos that were developed by our company's dedicated video team, ensuring a fun and educational viewing experience for young audiences.

**Midfield:** A exciting sports application that catered to sports enthusiasts by providing news updates and event broadcasting which kept the users informed and engaged with their favorite sports and sporting events.

**White Knight:** A dedicated platform designed to cater to the needs of passionate Tottenham Hotspur football club supporters. This comprehensive app offered a range of features to keep fans engaged, informed, and connected with their beloved team.

**ShedEnd:** The Chelsea Football Fan Application served as a centralised hub for fans to access the latest news, updates, and insights about the club. It provided news articles, ensuring fans were always up to date with team developments, transfer rumours, and managerial updates.

**RedGlory:** The Manchester United Football Fan Application served as a centralised hub for fans to access the latest news, updates, and insights about the club providing comprehensive fixture information, allowing fans to easily access match schedules, kick-off times, and venues.
