## WORK EXPERIENCE

### Senior Software Engineer

#### ValueLabs: Test Data Hub project

01/2020 - 01/2023

Hyderabad

*Doing the right thing. Always.*

##### Achievements/Tasks

- Fixed every bugs raised in the existing TDH (Test Data Hub) Application.
- Worked on the full stack development of the TDH App.
- Took ownership of the complete management of the front-end team and back-end team closely to make sure the deliverables were as per the requirements.
- Integrated Web Crawling feature with existing TDH Application which scrapes multiple websites and automates the scrapping process.
- Deployed and integrated software engineered by team to improve continuous integration practices efficiently.
- Featured a new synthetic data generation algorithm which generates geo specific data like country based name, address and phone number based on user inputs through Open API integration.

### Software Engineer Intern

#### ValueLabs: Test Automation Framework project

01/2020 - 03/2020

Hyderabad

*Doing the right thing. Always.*

##### Achievements/Tasks

- Executed multiple TAF testing and engineering processes before Production release.
- Ensured the developed software met the client's requirements in every sprints from a direct feedback.
- Extended my support in completion of maintenance on existing programs.
- Performed continuous identification, measurement, and improvement of processes.

### Software Trainee

#### OneYes Technologies

05/2019 - 06/2019

Chennai

*We provide solutions for your Business.*

##### Achievements/Tasks

- Worked as a software trainee where students were provided with hands-on practice session on basics of database management system and SQL.
- Shared knowledge on both practical and theoretical sessions on Query Languages.
