Academic Internship:

I Explored the IoT And Embedded System at the EakTech Private Limited Company

Academic Project:

TITLE: An IoT Smarth Health Monitoring with Medicine Dispenser and Alert system for Elderly People

Description: Theme of the projects is to help elder or old people to monitor their health every day and here the end user will be alerted to take medicine on time if in case they forget to take. If the end user health varies or if they are fail to take medicine on time, if the people forget to take the medicine on time the first alert will be for elderly people through buzzer. If then also they forget to take medicine on time then only message will be sent to care taker. Where, there will be an alert system like message which they receive through mail or an app that is designed for them. The alert system will be sent to the caretaker or the person who got register to check the health of the elderly people. In this way we plan to help the elderly people to take care of their health.

Strengths:

- Strong communication skills.
- Good Interpersonal and presentation skills.
