Project

Job Check

I am currently working in a project which is Job Portal called “Jobcheck”. My Role is Front End Developer in Angular.

This Portal will be for blue caller as well as white caller Job seekers. They can find and apply for jobs according to their area of interest and skills.

This app always gives you top ten jobs' suites for you based on the skills and resume and profile created on the app and always give you update and engage you in the learning new things.

Technology used: Tailwind, HTML, and CSS.

Key Responsibilities: Worked on front Screens from Sign Up to the My Profile pages. As well as worked on these key features like searching jobs for students, job seeker, TPO, consultancies etc.

CMD

I am currently working in a project which is CMD called "**Connect My Doctor**". My Role is Front End Developer in Angular.

Features:

Telehealth solution to connect patients and doctors.

Patients can book appointments for a particular doctor who will be suggested to them base on the symptoms they are facing and the availability of the doctors on the said date and time.
