- Mentored & assisted 1-member UI team on web application building, highlighting strong problem-solving skills and technical expertise.

WORK EXPERIENCE

UI Developer | Maanya Web Solution, Vadodara

(07/2019) – Present

Project1 | Kid's Outlet Online,

(06/2023) – (08/2023)

Utilized HTML | CSS | JavaScript | xd | Shopify CSS | JQuery | React for project development. As part of a collaborative team, I played a pivotal role in the front-end development of a Shopify-based e-commerce website for a client in the fashion retail industry. The project aimed to provide an intuitive and seamless online shopping experience for customers while showcasing the client's products in an appealing and user-friendly manner.

Responsibilities:

- **UI Implementation:** I was responsible for transforming the design mockups provided by the design team into functional web interfaces. I utilized HTML, CSS, and JavaScript to create pixel-perfect layouts that accurately reflected the visual concepts.
- **Shopify Customization:** Leveraging my expertise in Shopify's Liquid template language, I customized the Shopify theme to align with the client's branding and design specifications.
- **Responsive Design:** Ensured that the website was responsive and optimized for various screen sizes and devices. I utilized media queries and Bootstrap to create a consistent user experience across desktop, tablet, and mobile platforms.
- **Interactive Elements:** To enhance user engagement, I incorporated JavaScript functionalities to create interactive elements such as image sliders, product filters, and dynamic shopping cart updates. These features improved the overall user journey and streamlined the shopping process.
- **Performance Optimization:** Employed techniques like image optimization, lazy loading, and browser caching to enhance the website's performance. This resulted in faster loading times and a smoother browsing experience for visitors.
- **Cross-Browser Compatibility:** Rigorously tested the website across different browsers and devices to ensure compatibility and consistent rendering. I identified and resolved any rendering discrepancies to deliver a seamless experience for all users.
- **Collaboration:** Worked closely with the backend development team to integrate front-end components with backend functionalities such as product inventory management, order processing, and payment gateways.

Web Designer | Creative Galaxy, Vadodara

(07/2017) – (06/2019)

Responsibilities:

- Developed front-end web pages with HTML5, CSS3, and JavaScript.
- Performed testing of UI and services.
- Implemented new features and UI in an Agile environment.
- Developed accurate prototype concepts.
