## PROJECTS

### Project 1: Payroll System

**Role:Developer** *May 2023 - Present*

**Client:** Bajaj Allianz

**Tools & Technology:** AutomationEdge v-7.3, Process Studio, PostgreSQL.

**Description:** Designing robotics process for all Customers Payroll records.

#### Roles & Responsibility:

- Designing & implementing the Process.
- Designing a process to generating all customer payroll records sheets (data processing).
- Creating a different sheet of various stages of the customer records and preparing file.
- Creating a customer records file and share with user.
- Deploying the process on the AE server, testing the process.

## Mini Project : Vahan Parivahan BOT Fetching State and RTO wise Details

**Role:**Developer *Jan 2022 - May 2022*

**Mini Project:**

**Tools & Technology:** Automation Edge, Process Studio.

**Description:**

- Process will check the URL is valid or not if it's valid then go on that URL. If URL is incorrect then we will exit from browser and abort the Process.
- Then we click Fancy number after which new tab opens. In order to get the details from this tab we will use switch window plugin. In the next step we have given Input file which contains State and RTO information.
- Process for Fetching details of **Open Series Status/ Show Auction Status** from Vahan Parivahan website.
- Once the state wise data is written in one sheet of the excel file it will go to next RTO and write the data for that RTO in separate sheet.
