A highly motivated and focused recent graduate with a **B-Tech in Computer Science and Engineering**. I bring a strong foundation in the full life cycle model of software development, including proficient coding, and debugging, and a specialized expertise in an **object-oriented** approach towards software development. I am proficient in programming languages such as **Java and Python** and also have strong problem-solving abilities with a detail-oriented approach. I am eager to bring my skills and dedication to contribute to **innovative** projects at the organization.

SKILLS

Programming languages: Java, Python, HTML, CSS, **Development:** Microservices, Spring Boot, **Databases:** SQL, Hadoop, **Tools:** Git, **Engineering:** OOP, Data Structure & Algorithm.

EXPERIENCE

ASD | Intern | Remote

07/2022 to 09/2022

- It presents a comprehensive, project-based approach aimed at skill enhancement in **Java programming**,
- Have actively engaged in hands-on learning and practical experiences to cultivate their expertise in **Java development**.
- **Skills:** Java, OOP, Git

JPMorgan Chase & Co. | Software Engineer Virtual Experience | Remote

03/2021 to 05/2021

- I have diligently worked on specific modules, including:
- **Module 1:** Focused on Python, Git, and foundational programming skills.
- **Module 2:** Involved in the implementation of data visualization features, as well as contributed to various aspects of the web application using the company's proprietary framework. I have diligently worked on specific modules, including module 1.
- **Skills:** Data Structures, Git, Python.

PROJECTS / ACHIEVEMENTS/ CERTIFICATIONS

- **MALGO:** Advance **Voice Virtual Assistant**, simplifying daily tasks. It covers email, music, web access, social media, time updates, Wikipedia searches via voice, and more. Unique features include personalized greetings by time and voice-controlled **WhatsApp messaging saving 90%** of user time. Powered by **SAPI5 API**, also uses energy and pause **thresholds** for noise reduction and precise voice recognition.
- **Car Trade Registration website:** Creating a car trade registration website using HTML and CSS involves designing web interface where users can register their vehicles for trade or sale.
- 5-Star Coder at **HackerRank**.
- Database Programming with SQL by **Oracle Academy**.
- Got certified in Hadoop CCA 175 by the **Hadoop Apache Foundation**. Learn fundamental components such as **MapReduce, HDFS, and YARN**. Understand how high-level data processing tools like **Pig, Hive, and Spark work** with Hadoop.

EDUCATION

B.E-Computer Science Engineering | PIET, Kurukshetra University| CGPA: 8.26

08/2019 to 07/2023
