Professional Summary

A highly personable, competent, disciplined, confident and team spirited doctor recognized for excelling in varied culturally diverse and evolving social fabric of the millennial India.

As I have served a wide cohort of the Indian army. I also have the privilege of serving the district that produces the maximum number of soldiers in service and veterans of the Indian army.

The wide range of experience that put strenuous demands and shaped me as a clinician in aspects of social justice, poverty syndromes, social insurance, public health, overpopulation, education, violence. I now seek an opportunity to help people by applying my skills and knowledge.

The ongoing COVID 19 PANDEMIC is a reflection of human resilience, intelligence and ignorance. Mother nature can be very cruel and humbling. This entire period has made me look back and realize that only regularized and quality conscious institutions (military institutions, monasteries, academic institutions) with true leadership will survive the after math.
