Kirtee Firake

INFORMATICA POWERCENTER DEVELOPER

PROFILE

- ✓ **A competent professional with 7.6 years of experience in Informatica Powercenter 10.x and Teradata, SQL Server.**
- ✓ Currently associated with **Cognizant,Pune** as **Associate – Projects.**
- ✓ Worked in **developing ETL Mappings** for supporting **Data Extraction, Transformations and Loading** using Informatica PowerCenter.
- ✓ Good understanding of **data flow** and **data validation.**
- ✓ Experience in defining **Staging, Loadready and Atomic** Tables.
- ✓ Hands on experience in **analyzing Business Requirements** and **implementing End to End solutions for ETL** in order to develop and maintain the databases.
- ✓ Hands on experience in **Data Analysis, Data Profiling, and Data Warehouse.**
- ✓ Hands on experience in **implementing Data Security & Protection and Data Retention & Removal processes as part of Data Governance Operations.**
- ✓ Good understanding of **RDBMS concepts** and experience in writing queries using **Microsoft SQL server and Teradata.**
- ✓ Good understanding of **Snowflake Data Warehousing** and **received 5 badges for Hands on Essentials, issued by Snowflake.**
- ✓ Experience in **handling Scrum activities** including conducting daily scrum calls, maintaining ADO.
- ✓ Team player, Motivated, able to grasp things with analytical and problem-solving skills, **possess good communication skills.**

TECHNICAL SKILLSET

ETL tools: Informatica Power Center 10.x, SSIS, Snowflake

Database: MS SQL, Teradata

Tools: SSMS, Terada administrator, Teradata Assistant

Systems: Windows – XP, Windows 7

Office Automation Tools: MS Word, MS Excel, Outlook, PowerPoint

Ticketing tool: Experience in updating and maintaining tickets in **JIRA, ADO**

KEY ASSIGNMENTS

1. IT D&A_EDC

PROJECT DURATION – March 2021 to Till date

Employer: Cognizant, Pune

Tools: Informatica Power Center 10.5.2, Informatica Test Data Management Tool, SQL

PROJECT DESCRIPTION

- The project objective is to implement Data Security & Protection (Data Masking) and Data Retention & Removal processes for all available applications respective databases to provide secure and reliable environment for non-prod databases with less or no possibility of security threats.

ROLE & RESPONSIBILITIES:

- Used **Informatica Test Data Management Tool for data profiling** and **Informatica Power Center for (ETL)** extraction, transformation and loading data from prod databases into non prod databases.
- **Hands on experience in creating mappings, Sessions, Workflows from Development to Test and then to Production environment.**
- Developed Informatica Mappings to extract data from source, transform the data as per requirement and load the data in database.
- **Used different transformations like Filter, Aggregator, Expression, Joiner, Router, Sorter, Sequencegenerator, Lookup, Update Strategy**
- Developed sessions for the respective mappings.
- Review of the mappings.
- **Performed the ETL testing** of developed mappings.
- **Hands on experience in understanding data flow and data validation and resolving related issues**

2. Kesko

PROJECT DURATION – June 2016 to March 2021

Client – Kesko

Employer: Tieto India Private Limited, Pune

Tools: Informatica Power Center 10.1.1 HotFix2, Teradata, SQL, SSIS

Domain: Retail

PROJECT DESCRIPTION

- The project objective to create common reporting for the important retails chains data for European countries, to maintain the data warehouse to create the reporting useful for business processes. The different source systems are to be standardized in a common structure for the reporting tables.

ROLE & RESPONSIBILITIES:

- Used **Informatica Power Center for (ETL)** extraction, transformation and loading data from different sourcesystems into target database.
- Involved in extracting the **data from the Flat Files and Relational databases into staging** area.
- **Hands on experience in creating mappings, Sessions, Workflows from Development to Test and then to deployment in Production environment.**
- Developed Informatica Mappings to extract data from different source files, transform the data as per requirement and load the data in database.
- **Used different transformations like Filter, Aggregator, Expression, Joiner, Router, Sorter, Rank, Lookup, Sequence generator, Update Strategy**
- **Created SCD Type 2 mapping for incremental loading of data;** type2 updates where we insert the new record and update the old record in the target so we can track the changes in the future.
- **Performed the ETL testing** of developed mappings.
- **Responsible for handling module** - from requirement gathering till production deployment and maintenance
- **Expertise in resolving challenging issues** within timeline and providing required data
- **Expertise in resolving the queries reported by client/customer side** within timeline and as per expectations
- **Hands on experience in writing complex MSSQL queries and interaction with database**
- Used SSIS for creating multiple flows.
- Have experience in resolving issues related to SSIS and develop the needed flows as per business requirement
- **Hands on experience in understanding data flow and data validation and resolving related issues**
- Participated in **migration activities of on-premise servers on Azure**

CAREER COUNTER

- From March 2021 to Till Date - worked with Cognizant as Associate-Projects (IT D&A)
- From June.2016 to March 2021 - worked with Tieto India Pvt Ltd as Software Engineer (Informatica ETL Development)

EDUCATION DETAILS

Examination	Year of Passing	University/Board	Percentage
BE(CS)	2015	Savitribai Phule Pune University	60
HSC	2011	Savitribai Phule Pune University	66.83
SSC	2009	Savitribai Phule Pune University	76.46
