## SUMMARY

Experienced Front-end developer with experience in developing and designing frontend applications. Proficient in ReactJs and Javascript with a strong focus on delivering visually appealing and user-friendly interfaces. Demonstrated ability to collaborate effectively in cross-functional teams and deliver high-quality products.

## WORK EXPERIENCE

### Accenture

*Feb 2021 - Present*

#### FRONTEND DEVELOPER

##### DataOps UI

- Developed a web application for the DataOps platform, utilizing ReactJS, TypeScript, HTML, and CSS to empower users in managing, monitoring, and analyzing data pipelines.
- Engaged in the application's full lifecycle development from its inception to deployment.
- Developed comprehensive unit tests using framework such as Jest and React Testing Library to ensure code quality.
- Utilized SASS (Syntactically Awesome Style Sheets) for efficient and maintainable CSS.
- Managed application state and data flow efficiently through Redux and the Context API.
- Orchestrated the application deployment through Docker containers.

##### Intelligent Data Foundation UI

- Developed a dynamic and cross-browser compatible web application for a leading US energy company enabling the creation, configuration, and real-time tracking of data processing jobs.
- Engineered a dashboard for real-time job status updates, utilizing REST APIs and concise charts, significantly enhancing workflow efficiency.
- Proficiently implemented deployment of the application via Azure App Services, employing CI/CD best practices.
