HSC-2018	<b>BHARATHIYAR MATRICULATION HR.SEC SCHOOL, GUDUVANCHERY- 72%</b>
SSLC-2016	<b>BHARATHIYAR MATRICULATION HR.SEC SCHOOL, GUDUVANCHERY- 82%</b>

### ACADEMIC PROJECTS

Msc[IT]	This project about library mangement system using python django frameworks it develops use to convince the member to search the book and also ease of borrowing books from the library.
Bsc[CS]	This project principally valuable for the tourist's having no idea about the spot they need to visit. By given geographically based data system the sightseers and individuals moving to new urban areas can improve the direction of the spots to visit.This project websites "Tourism Mithran" provides the tourist with a city map on its present area entered by the android mobile phone client. This data causes the tourist to locate the desired area to visit. It consists of whole details of that area or how to achieve the area and also other emergency like hospitals, organizations, bus stops and so on yet it gives the fundamental data to choose the spots to visit.

## PROJECT:

Project Title:E-Commerce Website

### Project Description:

The E-Commerce Website is a comprehensive online shopping platform built using HTML, CSS, and JavaScript. This project aims to provide users with a seamless and interactive online shopping experience. Here's how the project works:

1. **\*User Registration and Authentication:\*** Users can create accounts, log in, and securely manage their profiles. Authentication ensures that only registered users can make purchases.
2. **\*Shopping Cart:\*** Users can add products to their shopping carts, review their selections, and make changes before proceeding to checkout.
3. **\*Order History:\*** Registered users can view their order history and track the status of their shipments.
4. **\*Product Reviews:\*** Users can leave reviews and ratings for products, contributing to the community feedback.
5. **\*Responsive Design:\*** The website is responsive, ensuring optimal display and functionality on various devices, including desktops, tablets, and smartphones.
6. **\*Admin Panel (optional):\*** An admin panel allows administrators to manage products, track orders, and handle user accounts.

### \*Technologies Used:\*

- HTML: For creating the structure and content of web pages.
- CSS: For styling and designing the website, including responsive layouts.
- JavaScript: For adding interactivity, form validation, shopping cart functionality, and dynamic product displays.
- Backend (optional): Integration with a backend server and database to store product data, user profiles, and order information.

### \*Skills Demonstrated:\*

- Front-end development using HTML, CSS, and JavaScript.
- User authentication and profile management.
- Shopping cart and checkout functionality.
- Responsive web design for a seamless user experience.
- Optionally, back-end development and database integration for data storage and retrieval.

This project showcases your ability to create a functional and user-friendly e-commerce website, a valuable skill for companies in the online retail industry. When adding this project to your resume, emphasize your contributions to the design, interactivity, and user experience enhancements you implemented.
