PROJECT 1

Domain : Investment Banking

Description: At Evercore ISI, our experienced Research, Sales, and Trading professionals deliver superior client service on a content-led platform. Every day, we strive to be The Street's best investment research resource to support our client's overall money management needs. Our best-in-class approach consists of:

- Publishing investment research that is accurate, relevant, timely, clear, and concise.
- Producing innovative, original research that uncovers relevant investment ideas not fully discounted by the markets.
- Understanding our clients' overarching needs, and providing them with the best possible customized solutions.
- Attracting and retaining a highly effective team of professionals who take pride in helping make our clients successful.
- Consistent with Evercore's commitment to a client-centric approach, Evercore ISI's trading professionals engage primarily in agency-only transactions, free of the potential conflicts of interest created by proprietary trading. Our team provides seamless execution, placing our client's interests first and executing every transaction with efficiency, objectivity, and discretion.
- With offices in New York, Boston, and San Francisco, our ability to execute across multiple geographies and asset classes makes Evercore ISI's global equity trading desks a preferred choice for discriminating clients. Evercore ISI offers both high-touch and low-touch equity, options, and program trading desks, as well as sector-specific and macro traders.

Roles and Responsibilities:

- Analyzed User Business Requirements, System Requirement Specifications(SRS).
- Written test cases manually for functional testing.
- Designing and executing test cases from the Functional Specifications.
- Performed Functionality Testing, Regression, and Retesting.
- Interact with developers and discussed Bug Tracking.
- Attend Scrum meetings.
- Detecting the bugs and classifying them based on the severity and reporting.
