MINI PROJECT:

Title : A Novel five-level voltage source inverter with sinusoidal pulse width modulator for medium -voltage applications.

Description:This project mainly focusing on five-level voltage source inverter for medium -voltage high-power applications. The inverter is based on the upgrade of a four -level nested neutral -point clamped converter. There a simple sinusoidal PWM scheme is developed to control and balanced the flying capacitors to their desired values &the converter is confirmed by simulation in MATLAB/simulink environment and the feasibility of the proposed converter .

MAIN PROJECT:

Title : Grid-connected wind-photovoltaic cogeneration using back-to-voltage source coverters.

Description:This project mainly focusing on the wind-PV cogeneration system s using vector controlled grid-connected BtB VSCs.The VSR at the wind generator -side is responsible for extracting the maximum wind power

following the wind speed variations. A well-damped performance has been presented using time-domain simulations results under the Matlab/simulink environment.
