### Objective

I want to succeed in a stimulating and challenging environment that will provide me with advancement opportunities.

### Experience

#### • Tele Performance

05-07-2021 - 17-03-2022

Analyst

Project:

Deepmind: RMI ( Remote Method Invocation)

- RMI consists of a robot and a human interaction. The robot must identify objects in home and pickup object which is instructed by human.
- Remote oriented robot listening to human and identify areas and objects in IHAL.
- There are different types of instructions which will perform by robot within time period.
- As an Analyst we have to judge the robot performance whether performed correctly or not by using success key or failure key.
- Each and every moment of robot, we must watch carefully.
- Sometimes we help the robot to pickup right objects.
