- IELTS

PROJECT DETAILS

- During the final semester of my MBA program, I successfully completed a comprehensive summer internship project. As a significant component of this project, I conducted an in-depth comparative analysis of two mutual funds with the objective of determining the superior investment option. This involved a thorough evaluation of various parameters to identify the fund that best aligned with our investment goals and strategies. Through this analysis, I honed my analytical skills and gained practical insights into the financial industry, enhancing my ability to make informed investment decisions.
