PROFESSIONAL SUMMARY

Highly seasoned and accomplished Software Quality Assurance Engineer with deep and broad proficiency in all types of corporate software. Strong and accessible teacher and presenter of difficult and complicated material to a variety of professional and non-professional audiences. Able to function well independently or as part of a team. I have enhanced my abilities in assessing requirements and setting up standards, performing actual systems testing, determining problems and needs, and resolving quality assurance issues. One of my objectives is to further expand my expertise in the field of quality assurance, and I am confident that, I can do this best if I will be part of a dynamic and competent environment.

PROJECTS

S&P Global (IHSMARKIT)

Payroll Organization: Pure software pvt ltd
Quality Engineer

(Aug2022-Present)

Automotive Mastermind is an automated sales and marketing platform that empowers dealers to increase loyalty and close more deals by predicting who is ready to sell or buy and communicating to them with proactive marketing. The Mastermind platform generates revenue opportunities from every corner of your dealership and for all types of buyers. The Behavior Prediction Score® (BPS) identifies when your loyal customers are preparing to return to market. by going a step beyond equity mining by layering in additional predictor and trigger data to give a complete view of who's ready to purchase. such as life events, household and sociodemographic data, personal behaviors, buying preferences and many other factors. This information tells dealers which customers to market to, what offers motivate them to buy, and how soon you should begin marketing to them — even when those opportunities aren't obvious. They mostly target Lease buyout customer or who purchase a car on lease.

Capgemini

Payroll Organization: Quess Corp pvt ltd
Test Analyst

(Feb2022- June2022)

- RegHub(Proact): It provides the Real-time regulatory tracking, notifications and mapping of rule changes from real-time tracking of global regulatory change, to intuitive linkage to impacted controls, policies, products, and processes, as well as efficient management of compliance and business change. It supports Triaged system alerts

CommDel Consulting Services Pvt. Ltd.
Associate QE

(Feb2021-Feb2022)

- PPaaS is a cloud-based Payment Platform as a Service (PPaaS) for merchant services provided by the service provider (Ingenico), that authorizes credit/debit card or direct payments processing through the Terminals/POS devices. The payment gateway may be provided by a bank to its customers but can be provided by a specialized financial service provider as a separate service, such as a payment service Provider. The service provider can maintain its own Tenants, Organization, Merchant's hierarchy and all Acquirers also. Rules for the Acquirers can be set by the service provider only.

-
- Smart testing and Quality Assurance (QA) are the keys to exceptional applications. Predictive Analytics, and Internet of Things are constantly forcing testing strategies to reinvent the process to promote superior user experiences, quicker outcomes, and fewer risks with software development cycles becoming more streamlined, organizations are finding themselves under considerable time and resource constraints. The undying challenge of keeping pace is balancing speed and test coverage to avoid risks and system defects

EMPLOYMENT EXPERIENCE HISTORY

S&P Global

(Feb. 202-June2022)

- Designing and writing Use Cases with TDD & BDD Methodology.
- Design test cases in Azure DeVops with all perspective (Positive, Negative scenario)
- Performing testing on backend and check logs in GCP,
- Performing functional and UAT testing.
- Performing API testing using Swagger & Postman.
- Performing database testing using PG Admin, Mongo.
- Performing Cross Browser Testing.
- Performing UI testing Zeplin.
- Run Smoke test during handover session of user story provided by the development team to reduce the number of defects at early stage.
- Defect reporting for the user stories to developers through Azure.
- Perform regression testing after each defect fixed to reduce the impact on previous working functionalities.
- Performing compatibility testing, forward and backward testing
- Perform Redis testing for data storing
- Perform ETL testing
- Publish the message on topic using pub/sub
- Daily basis run cron job
- Perform file validation on GCS

Capgemini

(Feb. 202-June2022)

- Designing and writing Use Cases with TDD & BDD Methodology.
- Design test cases in XRAY with all perspective (Positive, Negative scenario)
- Performing functional and UAT testing.
- Performing API testing using Swagger & Postman.
- Performing database testing using PG Admin.
- Performing Cross Browser Testing.
- Performing UI testing Zeplin.
- Run Smoke test during handover session of user story provided by the development team to reduce the number of defects at early stage.
- Defect reporting for the user stories to developers through Jira tool.
- Perform regression testing after each defect fixed to reduce the impact on previous working functionalities.
- Performing compatibility testing, forward and backward testing

Commde Consulting Services Pvt. Ltd.

(Feb. 2021 – Feb 2022)

- Designing and writing Use Cases with TDD & BDD Methodology.
