PROJECT-2:

- **Project Name** : Internal audit Management (**JUNE-2022 TO-2023**)
- **Client Name** : Danske Bank, Denmark United Kingdom.

Description

Internal audit Management

Internal audit is nothing but it is an independent, objective assurance and consulting activity designed to add value and improve an organization's operations.

It helps an organization accomplish its objectives by bringing a systematic, disciplined approach to evaluate and improve the effectiveness of risk management, control, and governance processes

Roles and Responsibilities for (Internal Audit Project)

- Performing Functional Testing, Re-testing, and Regression testing.
- Managing the changes and executing regression tests.
- Execute the test cases to validate customer requirement.
- Analyzing the UAT ticket raised by the client and identifying whether it is an issue or Inquiry.
- Reproducing the issue in QA environment to validate the reported defect.
- Assigning the ticket to the appropriate development team or individual to fix the issue.
- Communicating with the development team to ensure that the issue is resolved in a timely manner.
- Verifying the fix once it has been implemented to ensure that the issue has been resolved.
- Performing a successful patch deployment involves ensuring that the patch is installed correctly and making sure that the system or application remains secure and up-to-date with the latest patches and updates, without causing any adverse effects on the system or application being patched.

PROJECT-1

- **Project Name:** Loan Origination System. : (NOV-20219 TO JUNE-2022)
