ACADEMIC / TRAINING & INTERNSHIP PROJECT DETAILS

1) Project Name : Hospital Management System

Technology Used :

- **Front End:** Angular, JavaScript, Typescript, Bootstrap, HTML5, CSS3.
- **Back End:** Node.js , Express.js
- **Database:** MySql

Project Description :

The Hospital Management System is a state-of-the-art digital platform meticulously engineered to optimize hospital operations, enhance patient care, and facilitate efficient communication among healthcare professionals. Built on robust technologies such as Angular, JavaScript, TypeScript, Bootstrap, Node.js, Express.js, and MySQL database, this system is designed to provide a seamless and responsive user experience.

Role & Responsibility :

My role is Front End Developer. My responsibilities include designing and developing features for patient management, doctor interaction, medical records, billing, account details. And creating user-friendly interfaces for patients, doctors, and staff. Ensure data security, compliance with healthcare regulations, and seamless collaboration with back-end developers and designers to deliver an efficient and visually appealing system. Page 1 of 2

2) Project Name: Maha E Tender

Technology Used :

- **Front End:** JavaScript, HTML5, CSS3.
- **Back End:** Java
- **Database:** MySql

Project Description:

This is a plan to make Maha E-Tender publishing online. As a part of it, Maha E-Tender data is recorded along with particulars of the products, their specifications and conditions. Tenders published will be visible to the visitors of the site till the closing date of tender.

Roles & Responsibility:

My role is translate project requirements into intuitive and responsive user interfaces using HTML, CSS, and JavaScript. Create interactive elements for users to submit, view, and manage tender documents. Develop easy-to-navigate interfaces, ensuring smooth transitions and user-friendly interactions.
