EXPERIENCE

Tech Mahindra, Pune— *Junior Software Engineer*

June 2021 - PRESENT

EDUCATION

Pune University, Pune — *MSc. Computer Science*

2020 - 2022

GPA: 9.6

Pune University, Pune— *BSc. Computer Science*

2017- 2020

Percentage: 81.83%

HSC Board, Pune—12th

2016- 2017

Percentage: 60.00%

SSC Board, Pune—10th

2015- 2026

Percentage: 84.60%

PROJECTS

SHOTS— *Tech Mahindra*

Roles & Responsibilities:

- Collaborated with cross-functional teams to gather requirements and design technical solutions.
- Developed and implemented core functionalities using Java programming language, including data handling, logic implementation, and integration with external systems.
- Utilized the Spring framework and Spring Boot to design and implement user interfaces that facilitate the tracking and

SKILLS

Programming Languages

- JAVA
- CPP
- C
- Javascript
- PHP

Databases

- MySQL
- Informix

Framework

- Spring
- Spring Boot
- Codeignator

Web Technologies

- HTML
- CSS
- Bootstrap

Version Control Tools

- GIT
- Source Tree
- Subversion

Other Tools

- Putty
- WinSCP
- Git Bash
- Maven

management of held orders.

- Utilized Embedded C programming for specific low-level tasks and integrations within the system.
- Designed and implemented the Informix database schema to efficiently store and manage order data, ensuring data integrity and performance.
- Created SQL queries and statements to retrieve, update, and manipulate data as required by application functionalities.
- Implemented user interfaces using Spring framework and Spring Boot, ensuring responsive and user-friendly designs.
- Integrated Java and Spring components to provide seamless interaction between front-end and back-end systems.
- Deployed the SHOTS application on the WebSphere server, ensuring optimal performance and reliability.
- Developed Linux shell scripts to automate routine tasks such as data backups, system maintenance, and batch processing.
- Identified and resolved technical issues in the SHOTS application, conducting thorough debugging and troubleshooting.
- Created comprehensive technical documentation, including system architecture, code documentation, and user guides.
- Developed custom reports as required by users to provide insights into order status, issue resolution, and system performance.
- Participated in code reviews and discussions to enhance code quality and maintainability.
- Worked closely with project managers, business analysts, and quality assurance teams to ensure project milestones were met and requirements were fulfilled.

AWARDS

1. Selected for Lila Poonawalla Foundation scholarship for Master's degree.
2. Received 'Pat on Back' award at Tech M

COMET— *Tech Mahindra*

Roles & Responsibilities:

- Collaborated with cross-functional teams to understand business requirements and design technical solutions.
- Developed and implemented critical functionalities using Spring Boot, ensuring efficient integration of various system components.
- Designed and implemented workflow automation using the Camunda BPMN platform.
- Designed and optimized the MySQL database schema to capture and manage customer data, configurations, and system interactions.
- Developed SQL queries and statements to retrieve and manipulate data, ensuring data consistency and integrity.
- Developed RESTful APIs to enable secure and efficient communication between COMET and target systems.
- Created technical documentation, including system architecture diagrams, API documentation, and code documentation.
- Actively participated in code reviews and discussions, contributing insights to improve code quality and maintainability.
