 sush8274@gmail.com

 Bangalore, Karnataka.

SUMMARY

- Rigorous, task-driven professional with more than 2.3 years of experience in Manual Testing, Functional Testing, Mobile Testing and Automation Testing.
- Adaptable to new skills. Adept at communication skills with individuals and groups at organization level.

SKILLS

- Manual Testing, Web application testing.
- Software Testing Life Cycle (STLC) Functional testing, Non-functional, Regression Testing & Black box Testing
- JAVA OOPS.
- SQL
- AWS
- Test Data Management
- User Story Testing
- test automation and debugging
- Problem Solving and Analytical Skills
- Test driven development
- Project Collaboration
- Test Planning and Strategy
- Java-selenium automations Using TestNG and BDD cucumber.
- Cross Browser Testing
- Mobile Testing ,Cross browser Testing and Paralell testing
- Bug Tracking And bug Reporting.

TOOLS AND TECHNOLOGIES

- Bug Reporting Tools - Youtrack, JIRA.
- Selenium
- CI/CD Pipeline - Jenkins
- Git/GitHub
- Operating system- Windows, Linux
- Agile/Scrum

EDUCATION

- Bachelor of Engineering in Computer Science
- PU from Alvas College Moodabidri

PROFESSIONAL SUMMARY:

- 2.3 years of experience in Software Testing that comprises of Manual and Automation Testing in Investment and Financial domain projects.
- Involved in various types of testing like Functional testing, Non-functional, Regression Testing & Retesting.
- Well versed in Software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC).
- Well acquainted in Agile Methodology & actively participated in Scrum meeting. Proficient in Test Automation using Selenium WebDriver and BDD Cucumber.
- Good Knowledge in TestNG Data Driven Framework using Maven build management tool.
- Good experience in creating, modifying, and enhancing both Manual Test cases and Test Scripts created in Selenium Web Driver using Java programming language.
- Used Defect Management Tool like JIRA and YOUTRACK.
- Experience in developing the scripts using TestNG annotations.
- Developed and executed comprehensive test cases, and test scripts for functional, regression, and performance testing.
- Collaborated closely with development and product teams to identify and resolve defects, ensuring timely product releases.
- Experience in working on Page Object Model (POM) Design pattern & Page Factory.
- Executed test scripts on IE, Firefox and Google chrome.
- Good understanding in JAVA OOPS Concept .
- Experience of identifying web elements using Xpath, Handling Synchronization (Implicit & Explicit).
- Experience in Handling Popups, iframes, dropdowns, window handling.
- Experience in reporting tool like Extent report.
- Involved in the Designing and Execution of the test cases along with test Reports.
- Worked on Repository management tool like GitHub.

Work Experience :

Associate QA Analyst : VIT Infotech, Bangalore [Jan 2021 – Mar 2023]
Client – Trading Central Project

- Involved in designing an automation script for a Web Application using TestNG framework.
- Construct systematic test cases from scenarios for application based on the customer user stories or requirements.
- Assisted senior QA engineers in test case design, execution, and defect tracking.
- Gained hands-on experience with testing tools and methodologies used in the company.
- Identify testable scenarios and create test scenario documents
- Giving Software Quality Assurance before client release new changes on production server
- Build Automation script for generating Batch execution.
- Implemented Page Object Model framework with Java and Selenium.
- Created multiple test cases and test scenario documents as part of manual testing.
- Involved in Running and configuring Jenkins Jobs and Verifying reports for new changes
- Involvement in test planning, test script development, and execution.
- Build Automation for test scripts using Selenium with Java (POM) and reduced manual effort for regression testing by 90%.
- Developed and Executed manual and automated tests to find bugs
- Analyse test execution logs and create test reports.
- Defect reporting and defect status tracking till closure.
- Implemented Page Object Model framework with Java and Selenium
- Reporting defects and maintain the proper communication with the Development team and handling the defects till the closure.
- Participating in daily stand-up meeting and Sprint Demo meeting at the end of the Sprint.
- Day to day coordination with Product Owner and Developers to understand weekly milestones and plan the Testing strategies in accordance with it.
