PROJECTS

1) MISSION OF HOPE INTERNATIONAL Unlimited Innovations (July 2022 – Aug 2023)

MOHI Project was started with the mission to provide education in the disadvantaged communities of Kenya enabling the children to transform their lives and avail the opportunities to grow. The purpose of this project is to support the organization with computerization and automation of processes in several areas of management. Enable automation of school administration, enrolment, student attendance and performance processes. In addition, certain financial processes including LPO automation. The application design in consideration is focused on providing easy management and scalability to meet future organization vision. The system will not support payments through the system but will have provision to manually record the transactions. In addition, the project will be providing the report for the students / employee / LPO / Payslip / Other reports.

Technology: ASP.NET, MVC 4, .Net core Web API, C#, Entity Framework, SQL Server v18, jQuery, JavaScript, HTML, CSS, Azure DevOps.

2) GYM MANAGEMENT SYSTEM Kaashiv Info Tech (Dec 2021 – Jun 2022)

We take immense pride in delivering this project, meticulously tailored to meet our client's specific requirements. Our innovative solution empowers clients to effortlessly access and manage customer details, while also providing comprehensive insights into Gym details. Our dedicated team collaborated effectively to design and implement the dynamic forms integrated with a robust database. As a result of our unwavering commitment and efficient teamwork, we successfully completed the project ahead of schedule, exceeding our client's expectations.

Technology: .NET, MVC, C#, SQL Server, jQuery, JavaScript, HTML, CSS.

DECLARATION

I hereby declare that the information furnished above is true to the best of my knowledge.
