Key Skills

Hard Working
Team Player

Experience

June 2022 – Present

Software Engineer • Amdocs (Full time)

- As a software developer involved in the Vodafone-Ziggo merging project, my role entails overseeing the data flow, conducting thorough data checks, identifying, analyzing and reporting any data-related issues, and developing scripts for automation purposes, and resolving defects and creating escalations.
- I was able to resolve more than 95 percent of the defects assigned to me in the short period I have been here.

Feb 2021 – June 2022

Graduate Engineer Trainee • Guardian Life

- Worked as Java Developer in GPT integration project Participated in development of functional and non-functional requirements from customer. Participated in site installation support for failures or bug fixing tasks for raised issues after installations. Java 1.7, Junit, Kafka, Spring, hibernate, docker languages/frameworks were used for this project.

Project Work

Online Bakery Shop

- During our internship, we developed a project in PHP language where we facilitated doorstep delivery of bakery items to customers, eliminating the need for them to visit a physical store in case they had a busy schedule.

Virtual Classroom

- In the .NET language, we undertook a project where we aided students who were unable to attend their lectures for various reasons.

Technical Skills

Java
Hibernate
Spring Boot
MySQL
Git
Docker

Technical Interests & Tools

- Java
- Hibernate, Spring Boot
- Agile Development Process

Awards and Achievements

- Earned a certification of recognition in handling VodafoneZiggo in OMS incident and Release handling from Manager and Line Manager.
- During my college years, I participated in an Ajmer tournament and achieved victory in two matches while playing kho-kho.

Hobbies

- I love dancing.
- As much as I like technical aspects of my career, I do like to take out some time to cook for family and friends, and I cook well too.
- Love to do Sketching.
