PROJECTS

VRMS

VRMS, or the Vehicle Rent Management System, is a mobile application designed to efficiently manage vehicle rentals. It serves two primary customer segments: retail users and corporate users, each receiving specialized services. The system prides itself on its excellent management capabilities.

Java Support Maintainece (Augustus Martin)

The Augustus Martin Ltd project involves the development of a Java application focused on generating artwork for Tesco customers. The application's primary objective is to facilitate the creation of artwork tailored to the specific needs of Tesco and its customer base. The application streamlines the artwork generation process while ensuring high-quality output. Maintenance and Support : Ensuring the smooth functioning of the application by promptly addressing any technical issues, glitches, or disruptions that may arise during its operation. Bug Identification and Resolution : Thoroughly testing the application to identify any bugs, inconsistencies, or unexpected behavior. Once identified, promptly resolving these issues to maintain the application's reliability.

Feature Enhancement : Continuously working to improve the application's features and functionalities based on user feedback and evolving requirements.

Technologies use – Spring MVC(Model View Controller), JSP(Java Server Pages), PostreSQ

SKILL SET
