

Gulshan Nadaph

Quality-oriented, motivated QA Lead with 10+ years of experience implementing high-quality standards and procedures, ensuring client requirements are accurately executed, and monitoring various processes.

EXPERIENCE

Bentley Systems, Pune — QA Lead July 2022 - PRESENT

Mobiquity Softech, Pune — QA Lead
July 2017 - July 2022

Cyperts, Pune — Senior QA
May 2015 - July 2017

Cybage Softwares, Pune — QA
Dec 2012 - April 2015

ROLES AND RESPONSIBILITIES

Team Management:

- Assign and manage tickets or tasks to QA team members, ensuring efficient workload distribution.
- Recruit, train, mentor, and evaluate QA staff.
- Create unit test tickets and provide support to the development team in unit testing efforts.
- Establish clear roles and responsibilities within the QA team.

QA Strategy Development:

- Create and execute a comprehensive QA strategy and roadmap.
- Define QA standards, processes, and methodologies.
- Ensure that QA objectives align with the organization's overarching goals.
- Ensure adherence to best practices and standards in quality assurance.
- Create and manage Continuous Integration/Continuous Deployment (CI/CD) pipelines to streamline test execution and deployment processes.

Collaboration

- Actively participate in release planning and product design to ensure testability.
- Collaborate closely with cross-functional teams, including testers, business analysts, developers, project managers, and others, to test complex projects and enhance software product quality.
- Conduct milestone and sprint work demonstrations for both internal teams and stakeholders.
- Share progress and updates on project status.
- Participate in Agile ceremonies such as Sprint planning, Sprint Retrospectives, Product Backlog Refinement, and daily Scrum meetings.

Risk Assessment and Mitigation:

- Identify and assess risks associated with product quality.
- Formulate risk mitigation strategies and contingency plans.

Continuous Improvement:

- Continuously enhance QA processes and methodologies.
- Implement industry best practices and remain updated on QA trends.
- Conduct regular process audits and quality assessments.

Test Planning and Execution::

- Create test plans, test cases, and test scripts.
- Execute test cases to validate software functionality and performance.
- Ensure comprehensive test coverage and the identification of defects.

Automation Testing:

- Work with Page Object Model using Page Factory in Selenium and Cypress for web automation.
- Write scripts in Appium for testing Android and iOS devices.
- Write API automation scripts.
- Conduct API testing to ensure the integrity and functionality of backend services

EDUCATION

Trinity College of Engineering, Pune — *BE Computer Science*

Aug 2008 - Aug 2012

ROJECTS

Sensemetrics — Web App for Dam monitoring.
