---

### Professional Summary:

- **2** years of experience in Android App development.
- Passionate about learning and creating great applications built with maintainable code.
- Analyzing the Requirements, developing solutions and interacting with team members to provide effort estimates, Coding and Unit Testing.
- Good experience and fundamental knowledge of architectural patterns (MVVM).
- Extensive knowledge and working experience of App development technologies such as core Java, kotlin.
- Developed Junit tests for code coverage and Espresso for instrumentation tests.
- Used Jenkins for the build process, continuous integration.
- Worked closely with core technology teams and other platform teams to balance cross-platform consistency with Android optimization
- Participating in the Sprint Planning and User Story Grooming sessions and suggesting can-do and cannot-do in each Sprint.
- Involved in providing the technical support for the applications by troubleshooting and resolving the issues.
- Interacted with business and QA teams to deliver the final product within deadline.

### Technical Skills:

- **Programming Languages:** Java,Kotlin
- **Mobile App Development:** Android

- **Code Editors:** Android studio,Eclipse

### Professional Experience:

- People Tech Group, Hyderabad – Junior Software developer from April 2021 to Present

### Projects:

#### **Virtual Cockpit System:**

**General Motors Project for Car Infotainment using Virtual Cockpit System and worked on Ultra Cruise application.**

- Ultra-Cruise is an upcoming semi-autonomous driver assistance feature, which is hands free advanced driver assist systems.
- Customize the UI to look the same for the user in the preferred theme and make the support multiple themes using RRO and to support the MFC.
- Involved in all stages of application development from requirement gathering, analysis, implementation, bug fixing and final delivery of the product.
- Designed responsive UI using the Constraint Layout.
- Developed application business logic with Kotlin and covered functionality with Junits.
- Root cause analysis of defects raised during app development cycle and fixing them.
- Maintain, enhance, and recommend solutions that best suit business and technology needs from an application standpoint.
- Used JIRA Tool for keeping track of bugs, Issues, Workflow, and release.
- Used GIT for accessing the repositories and maintaining the code.

### Education Qualifications:

- Bachelor of Technology in Engineering Sree Vidyanikethan Engineering College - Tirupati
