ABOUT ME

QA tester with 9 years of experience managing software testing and automation projects throughout the testing phase. Proven expertise in ensuring software reliability and performance by conducting quality assurance and automated testing include test case creation, test execution, test script development, CI/CD and implementation of test plans and defect tracking.

SKILLS

Digital Skills

Microsoft Office package: Microsoft Word, Excel, PowerPoint, Access / Google (Google Drive, Google Docs, Google Slides, Google Sheets, Google Meets, Google Trends))

Technical Skills

Functional testing / Api Testing / Test Data Management / Regression Testing / User Acceptance Testing / End to End Testing / Defect Management / Browser testing / Mobile Testing / Selenium / Java / Testng / Cucumber / Page Object Model / Maven / Jenkins / GIT / QC / JIRA / Accelq

WORK EXPERIENCE

Technical Test Lead

Infosys Limited [26 Jul 2021 - Current]

City: Bangalore

Country: India

- Leading the automation team of 6 people scattered across and ensuring the delivery of all the automation projects- and deliverables.
- Developing the scripts using testng framework using Selenium with Java
- Developing the automation test script for UI and API using Accelq tool.
- Developed the API automation using Jmeter to create the huge amount of test data.
- Performing Requirement Analysis, Test Planning, Test strategy preparation, Test design and execution, Test reporting, Defect Management.
- Implementing CI/CD pipelines using Jenkins
- Participation in Product Backlog Meeting and Sprint Review, Retrospective and Sprint planning meeting for understanding the business process within each Sprint, understanding of Epic and User stories and mapping them to test cases.
- Maintain and continuously improve standards of automated test suites of System, Integration, E2E automation suites and ensure the execution of these before software releases
- Performing the cross-browser testing and mobile testing using Browser stack
- Developing customizable test reports for the Web and API using Extent Reports and Creating the dashboard to for Defects in QA Dash for overall dashboard view.
- Implementing, creating and maintain the Prerequisite test data needed to the Automation test suits using Test Data management tool
- Setting up the automation tools and processes for upcoming projects and assisting the team in handling the automation tasks.
- Monitoring and tracking all the automation activities across the projects and maintaining a track of the automation Status of the applications
- Performing impact analysis on the regression test suites with the new changes due to the upcoming sprints
- Demoing the shippable product developed during the sprint.

Senior Test Engineer

Aspire System Private Limited [1 Jun 2020 - 19 Jun 2021]

City: Chennai

Country: India

- Performing testing in API and Informatica.
- Test Data Analysis, Product Configuration, Doing the account setup in Salesforce application
- Attending the agile ceremonies
- Highlighting the risk on time
- Creating the dashboard for defect and test results
- Requirement Mapping and defect linkage in QC for audit purpose.
- Analysis and prioritization of tasks and issues, handle status calls and defect triage meetings.
- Preparation of the dashboards to submit the daily reports during execution.
- Preparation of the Test Summary Report and Retrospection document

Programmer Analyst

Cognizant Technology Solution [24 Jul 2014 - 7 May 2020]

City: Chennai

Country: India

- Discussing the automation feasibility and finding out the best areas for capturing high ROI and for reusability of the scripts across various applications/teams.
- Designed and developed well defined BDD framework using Selenium with Java language.
- Developed Data Driven functions using Apache plugins.
- Developed easily maintainable Object Repository for the GUI elements.
- Developed high rich HTML test reports using Extent Reports.
- Implemented CT Pipeline for different test suites like Sanity, Regression and Functional using Jenkins.
- Maintained the GIT Repository by pushing the active code in master branches and performing Code reviews to the developed automation scripts.
- Created the test cases using ADPART tool.
- Preparation of the Test Plan and Resource loading estimations.
- Highlighting deviations for the sprints well in advance with respect to the sprint backlog.
- Attending project review meetings.
- Maintaining the Traceability Matrix for Requirements, Scenarios and Test Cases.

EDUCATION AND TRAINING

Bachelor of Science in Information Technology

Hindusthan College of Arts and Science

City: Coimbatore

Country: India

LANGUAGE SKILLS

Mother tongue(s): **Tamil**

Other language(s): **English**

IDEAS & INNOVATION

- Implemented automation regression testing for 2 application and provided the cost savings on the monthly basis.
- Implemented ADPART tool for test case design.
- Implemented the in-sprint automation testing for Agile project. Implemented i-Dashboard for Agile Project.
