EXPERIENCE

DATA ENGINEER

Vamstar Pvt Ltd

Jan 2021 - Till now

- Doing live test for sources from Redshift
- Review the JSON files downloaded from the AWS platform, identify any issues and fixing the same and update the existing JSON files.
- Perform web scrapping to extract data and deliver quality data in tight deadlines.
- Set up a Git repository, create feature branches for each task, regularly commit and push them to the corresponding branches.
- Once validated, merge the branches into the main branch and create a pull request.
- Conduct training sessions virtually, to introduce new hires to web scrapping concepts and workflows and provide hands-on exercises and examples to allow new hires to practice web scrapping.
- Consistently focussing on discovering tender sources.
- Analysing and handling Quality Analysis for data scrapped.
- Creating Jira tickets to track the pull requests for merging changes into the development branch and update the Jira ticket to reflect the status change and progress made.
