Skill

Databases: Oracle ,SQL Server

Programming Languages: SQL , Unix

Testing Skills: ETL Testing, Functional Testing, Bi Testing

ETL Tools Used: SSIS , Informatica (IICS)

Other Applications: SQL Developer , Jira , Excel

ROLE : ETL Tester, Functional Tester, Manual Tester

Education Background

MCA Bharathiyaar university(2007-2010)

Experience

Feb 2018 – Till Date
Software Engineer
Recordium Apps,Chennai

Objectives

Seeking to work in a challenging work environment where I can utilize my expertise in resolving the problems, analyzing business needs, and advocating my analytical skills toward the growth the organization.

Professional summary

- Having 5+ years of relevant experience in ETL testing, database testing, DWH testing, Report testing with skillset of Oracle SQL, Unix, SSIS, INFORMatica AND ETL concepts.
- Well-versed with all stages of Software Development Life Cycle (SDLC) and Software Testing Life Cycle.
- Handling banking-related projects and validating extensive data volumes in the source and target environments .
- Sound Knowledge and experience in Metadata and Star Schema/ Snowflake Schema. Analyzed Source Systems, Staging area, Fact and Dimension table in Target in Data Warehouse.
- Adept at working collaboratively with cross- functional teams to deliver high-quality, error-free solutions.
- Developed complex SQL queries for querying data against different database for data verification process.
- Experience in JIRA for Bug Reporting and Tracking
- Clear understanding of business requirements, validate mapping sheet and ability to work as a team

Project 1

2021 August- TillNow

Role: ETL TESTER , BI Tester

Client: Vetiva Capital Management,Nigeria

Domain : Banking and Finance

Database: Oracle, SQL Server

ToolsUsed: IICS, JIRA

Roles And Responsibility

- Understanding the business flows and prepare the testcases , execute the test cases and raising the defects by using test management tool in JIRA.
- Developing ETL scripts based on technical specifications/data design documents and source to target mappings.
- Strong understanding in software testing life cycle process.
- Performing data validations between Source and Target according to mapping document.
- Raising the defects in JIRA according to mismatches and assigning corresponding team members and interactions with BA & Dev teams to resolve the issues.
- Carryout project testing according to the test plan.
- Conducting system integration and functional testing, throughout the project in various iterations/sprints.

Project 2

2018 Feb – 2021 June

Role :ETL Tester , Functional Tester

Client : Herenco Invest, Swedan

Domain : Capital Market

Database : Oracle, SQL Server

Tools Used : SSIS, JIRA, Excel, SQL Developer

Roles And Responsibility

- Analyzed the business requirement of new change request from client.
- Defects identified in testing environment are communicated to the developers to resolved the bugs
- In my role as an ETL Tester, I conduct end-to-end testing of the data warehouse by executing testcases that covered the entire process.
- Analyzed the output results and prepared the test summary report While closed the test process.
- Involved creation of mock data by using the DML commands INSERT,UPDATE,DELETE. whenever the test data is needed to validate the flow of data.
- Escalation of the business of the issues wherever faced to the appropriate authorities to bring it up to their notice and get immediate solutions .
- Involved demonstration of the completed points to the scrum master and product owner in the sprint review meeting
