About me

I am a Creative, Self-Driven, and Passionate Individual with 3+ years of Industry experience in UI/UX Designing and Rapid Prototyping.

I deeply care about honesty and transparency, it's at the center of everything I do. I prioritise accessibility and inclusive design to ensure that the user experience is accessible to all individuals, ultimately enhancing the overall user experience.

Experience

TATA-ELXSI (April 2022 - Present)

- Handling all the design deliverables and conducting UX audits to bridge the gap between conceptual designs and real-world for delightful experiences.
- Conducting user research for incorporating new functionalities, creating user flow diagrams, designing information architecture, storyboarding the user experience, and creating annotated wireframes and visual designs.
- Consistently assisted the development and QA teams, addressing any doubts they had during the process, in order to enhance the business perspective.

BotRecruits (July 2021 - April 2022)

- Consulting with clients to understand their goals and gathering User Requirements.
- Conducting Research, developing Personas and User Scenarios, Illustrating design Ideas using Information Architecture, Process flow, and Sitemaps.
- Developing UI mockups and prototype, that illustrates functionality as well as look and feel of site in real time. Iterating them based on user feedback.
- Creating Original graphic designs and vector illustrations.
- Preparing and presenting rough drafts to internal team and key stakeholders.
- Conducting sprint meetings with product manager and developers.
- Identifying and troubleshooting UX problems like responsiveness, etc.
- Creating consistent UI by adhering to style standard on fonts, colors and images.

Freelancer (Jan 2020 - July 2021)

- Interacting with Client and conducting interview sessions.
- Understanding and Analysing User Requirements.
- Researching and Creating Process flow, and Sitemaps.
- Developing UI mockups and prototyping.
- Creating coherent design standard for fonts, colors and images.
- Iterating Visual design based on User feedback.
