PROJECTS

Employee Review System [Source Code](#) [Hosted URL](#)

- This is a full-stack application that enables the admin to assign employees to review each other's work. The admin can promote or create new employees, view current employees, and remove them based on their performance. All reviews are stored in the database.
- TechStack Used - Node.js , Express, Mongoddb , EJS , JavaScript , HTML, CSS and Visual Studio Code

React Commerce App [Source Code](#) [Hosted URL](#)

- A React e-commerce app enables users to browse, search, add to cart, and purchase products online using a user-friendly interface.
- TechStack Used - React JS , CSS and Visual Studio Code.

Alarm Clock Project [Source Code](#) [Hosted URL](#)

- The Digital Alarm Clock project allows users to set multiple alarms, displaying the time with an updating digital clock. Alarms can be added to a list, customized to play at designated times, and removed with a delete button
- Tech Stack Used : HTML, CSS, JavaScript, and Visual Studio Code

ToolTip [Source Code](#) [Hosted URL](#)

- A simple tooltip component such that when hovered over upon a button it shows a tooltip.
- TechStack Used - React JS , CSS and Visual Studio Code

INTERNSHIP

Summer Intern at RajMahal Coalfields

[June 2019 - July 2019]

The project involves studying the purchase module in the RajMahal area, encompassing item part and part details, indent, tender process, and purchase order.
