- **S.S.C** Board of Secondary Education, from S.S.K High School in the Academic Year 2015, with an aggregate of 8.7 GPA.

Project #1

Payment Gateways on Braintree, PayPal Invoicing, PayPal Flow and Amex

Duration : 4 months

Role : Team member.

Project Description:

PayPal Invoicing: PayPal makes it simple to send professional, customized invoices. PayPal emails your customer a link to the invoice or you can supply a link in your own email. Then the customer views invoice details and securely pays with a credit card, debit card, PayPal, or PayPal Credit.

In PayPal Payment Gateways I have worked on the Partial payments, Order edit, and adding discounts, taxes and freight costs and with new card transaction as per the Client requirement.

Braintree payment gateway: Braintree will connect you to all of the banking institutions and payment processors that you need in order to collect money from your customers.

In Braintree, I have worked on implementing the code with New Card transaction.

American Express: It also known as Amex, is a global services company that offers a payment gateway (American Express Payment Gateway) as well as world-class Credit Cards.

In Amex, I have worked on implementing the new tab based on Virtual Card details.

Pay Flow: Pay Flow Gateway is PayPal's secure and open payment gateway. Using the Pay flow Gateway APIs, merchants can process debit and credit card payments, PayPal, PayPal Credit, authorizations, captures, and credit voids. PayPal Payments Pro internally utilizes Pay flow Gateway and its API, providing the same features.

Responsibilities:

- Worked with Asp.net Framework, Entity Framework
- Worked on HTML/CSS to make the UI more attractable.
- Worked with password Encryption for password safety.
- Worked with JavaScript for front end validations.

Environment: Microsoft Visual Studio.NET 2019, SQL, HTML, CSS, .NET Framework 2.0, and Entity Framework, LINQ, SQL Server 2014.

Project #2

Channel Advisor

Duration : 1 months

Role : Team member.

Project Description:

Channel Advisor provides brands and retailers a centralized platform to manage marketplaces, digital marketing, direct-to-consumer, global expansion, first-party retail, drop ship and fulfillment needs.

When we send current inventory information to Channel Advisor through a periodic function that generates a file and transfers it to FTP server; Channel Advisor account can then pull the file from your FTP server so it can apply the inventory updates. The periodic function does not include any additional information about the items/SKUs, such as descriptions or images.

Worked on the Batch screen to create the product and the inventory syncs for the processing screen to validate the data from the database.

Responsibilities:

- Worked with Asp.net Framework.
- Worked on HTML/CSS to make the UI more attractable.

Environment: Microsoft Visual Studio.NET 2019, HTML, CSS, .NET Framework 2.0.

PERSONAL DETAILS

Name	Manda Santhipriya
Place of Issue	Mylavaram, Vijayawada
Marital Status	Single
Date of Birth	24 ^h November 1999
Languages Known	English, Telugu, Hindi
Nationality	Indian

Declaration:

I am confident of my ability to work in a team. I hereby declare the information furnished above is true to the best of my knowledge.

Manda Santhipriya
