- Working with new implementations and bug fixes.
- Interacting with product team to the product requirements.
- On time delivery without any regressions issues.
- Attending scrum and discuss about the changes.
- Working with data logics and responsive interface.

- Using technologies: Java, Angular JS, Html, CSS, Bootstrap, GitHub, Elastic Search, JavaScript, kafka.

## PROJECTS

### Project Name : Falken speedshop (Phase I & Phase II)

#### Description:

Falken Tire is a brand of passenger car, and medium truck tires. Falken Tires, known as a leader in high performance tire technology for cars, trucks, SUVs and crossovers, has successfully built a reputation as a full-line tire manufacturer with a long history of delivering high quality, high value products. They have dealers world wide.

Developed the website (portal) for their dealers to submit an orders , view invoice and shipment details under the web development. Provided the sync from oracle to ES through java. And we maintain the supply chain process (invoice and shipment)

In phase II , provided the login for SRNA users to track and manage their customer orders and shipment information internally. Completed the projects and integrated with their website.

**Role:** Program Analyst

**Environment & Technologies Used:** Java, Java script, Angular JS, Apache tomcat 7 & 9, Kafka, Elastic search, Windows, Ubuntu, Wincsp.

#### Responsibilities:

- Designed the full website
- Provided the login for their dealers.
- Developed the orders (create and update), invoice, shipping and warranty claims app.
- To allow the user to access the apps based on the roles and privileges.
- All the users to delete/cancel the orders, provided reorder option
- Export the data and provided the Print PDF options
- Search and Advanced search
- Optimized the data sync from oracle to ES using Kafka and Java
- Provided shipping management and SRNA internal employees login in Phase II.

### Project Name : Apptivo Customer/Xinnect Portal

#### Description:

There are numerous situations where you might need to keep a customer informed of the status of a specific in the Cases/Invoice/Projects/Answers App. Apptivo provides the ability to add third-party customers to specific cases/invoice/projects & answers, so they can login and view the progress in details using their own account.

Developed the product effectively, worked on the enhancements and features which is requested from customer. Using this portal, they can restrict some features from their employees, like only provide the view option or else provide both create and view options to the records.

**Role:** Java Developer

**Environment & Technologies Used:**

Java, Java script, Angular JS, Apache tomcat 7, Elastic search, Ubuntu.

**Responsibilities:**

- Optimized the login & signup and provided the multi firm access.
- Provided the email template, customer can customized their email template
