PERSONAL SKILLS

Critical Thinking, Leadership, Attention to detail, Communication, Creativity, Time Management.

PROFESSIONAL WORK EXPERIENCE

Organization : BNP Paribas India.

Designation : Associate Software Engineer

Duration : June 2022 to May 2023

Project Name : Beacon

Technologies : .Net, C#, MSSQL, JavaScript, MVC, HTML/CSS, jQuery, Angular, Web Api.

Role : Full Stack Developer

Domain : Banking

Description : Beacon - Base for Accounting Controls is a centralized platform designed to streamline and enhance our global control management processes. It serves as a singular repository, capturing, maintaining, and overseeing the regular completion of controls across all regions in Corporate and Investment Banking (CIB). The system efficiently manages control plans, static data, workflows, and email notifications, promoting a cohesive and proactive approach to control administration. Beacon's robust reporting capabilities offer valuable insights into control status and performance, ensuring a comprehensive and compliant control environment throughout the organization.

ACADEMIC PROJECTS

Title : DroneBiz (J2EE)

Duration : 1 Month

Description : An online e-commerce website inclined towards sale of drones. Website can be accessed and managed by users and admin with the help of role based login feature. Registration confirmation to the user done by Mail Sender facility. Session storage is implemented to track the user. On booking of the product, invoice is generated in pdf format. A feature to allow users to host their product on rental basis is implemented. Front end developed in React and backend with Springboot and MySQL.

Title : Adhar based EHR Medicare system (Android Programming)

Duration : 6 Months

Description : An Aadhar-based Electronic Healthcare System incorporating real-time patient monitoring is implemented, leveraging hardware devices for health parameter tracking. The system facilitates doctor appointment scheduling and ensures secure storage of patient data. Additionally, it provides functionality to locate nearby pharmacies and hospitals, enhancing the overall accessibility and efficiency of healthcare services.
